Hi Sarah,

Yes, I was telling Jeremy that your section was closest in line with the tone of the TSD and the way we would explain assessing feasibility state measures. We'll probably use the bulk of it in our write up. I actually think for now we have it covered, (here at EPA) so no need to do anything tonight. Denise and I are writing up a version today/tonight and we possibly may send it over tomorrow for you guys to take a quick look and see if there are other details we may want to address.

Thanks for checking in!

Robyn

Hi Robyn,

I spoke with Jeremy this morning. What is your timeframe for getting this back? I am out of the office in a meeting for most of the day today but if you can point me to specific sections of the preamble, I can try to flesh out my section in the context of the preamble this evening.

Sarah
